

PDF Utilities - Test Document

This is a test PDF to verify the @pdf Chat Participant.

Architecture

This repository is a VS Code extension that registers PDF tools with the Language Model Tools API.

```
copilot-pdf-utilities/  
├── extension/  
│   ├── src/  
│   │   ├── extension.ts    # Activates the extension and registers tools  
│   │   ├── tools.ts        # LanguageModelTool implementations  
│   │   └── pdf-tools.ts     # PDF business logic  
│   ├── tests/  
│   │   └── pdf-tools.test.ts  
│   └── resources/  
│       └── instructions/  
└── test-document.md        # Source used to generate this PDF fixture
```

The extension exposes 7 PDF tools for reading, creating, merging, splitting, updating metadata, and extracting pages. It uses `pdf-lib` for PDF creation and modification, and `pdf-parse` for text extraction.

Section 1: Introduction

Lorem ipsum dolor sit amet, consectetur adipiscing elit.

Sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

Key Features:

- Read text from PDF files
- Get PDF metadata
- Create new PDFs from text
- Merge multiple PDFs
- Split PDFs by page range
- Update PDF metadata
- Extract individual pages

Section 2: Technical Details

Page 2 of 3

Architecture:

Technologies:

- TypeScript 5.3 with strict mode

- pdf-lib for PDF creation and modification
- pdf-parse for text extraction

Revenue Data (Q1 2026):

January: \$125,000

February: \$142,500

March: \$158,300

Total Q1: \$425,800 Section 3: Conclusion

Page 3 of 3

This test PDF demonstrates the @pdf Chat Participant capability to extract and analyze text content from PDF documents.

Summary:

- 7 PDF tools available via MCP
- @pdf enables direct PDF interaction in Copilot Chat
- No more yellow warnings when attaching PDFs
